

## Communicable Disease Case Information System

*Bridging the Gap Between Communicable Diseases*

### CDCIS.HIV

- ▶ HARS/eHARS Compliant System
- ▶ CTS Compliant Database
- ▶ ADAP – AIDS Drug Reimbursement Program Tracking
- ▶ Capable of integrating with State Pharmacy for drug reporting
- ▶ Reporting to CDC through HARS
- ▶ Complete Provider tracking system
- ▶ Complete Contact tracking

### CDCIS.STD

- ▶ STD\*MIS Compliant System
- ▶ Integration with 4.0 Demographic database of the CDCIS suite of applications
- ▶ Field Record & Interview System
- ▶ Integrated with v4.0 Electronic Laboratory System
- ▶ Integrated with v4.0 Provider System
- ▶ Generation of NEDSS file for reporting to CDC
- ▶ Complete Reporting System
- ▶ Complete Contact tracking

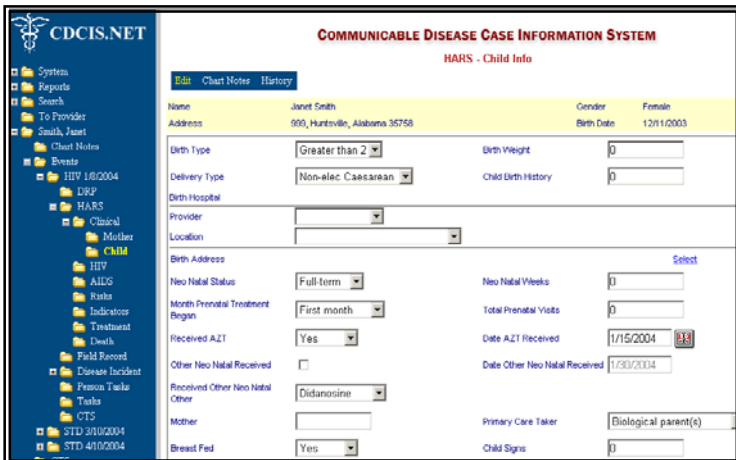

#### Drug Reimbursement Program Screen:

*Tracks applicants who are eligible for the drug reimbursement program which allows information to be immediately sent to the client for approval and the client-selected pharmacy to dispense approved medications.*

## The Future of CDCIS

- CDCIS System is being designed to be a complete TB, AIDS, and STD Tracking System
- Auto exporting to NEDSS will be provided
- PHINN Messaging System
- HL7 for receiving electronic lab reports
- Additional patient management and daily tracking reports
- Complete Scheduling System for tracking patient management events such as: interviews, tests, follow up events, etc.

#### Child Info Screen

*The Child Info Screen allows enduser to enter information about a child's birth, prenatal visits, contact information, medication, etc.*

## Management

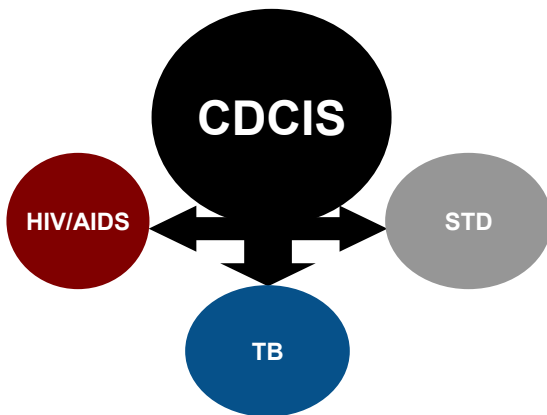

- Management may customize “responses” to change text, values, and more for any field. Plug-in policy libraries support further customization
- Management may restrict user groups to specific screens and may further limit user commands within those screens
- Flexible navigation minimizes clicks and reacts to context. Custom wizards provide alternate navigation.

## Security

- Application
- Group Based
- Page Level
- Patient Location
- Database Level Security

## Customization

- Required Fields
- Help Dialogs
- Enabling/disabling of fields
- Making Fields Not Visible
- Page Load Event
- Pre & Post Database Commit Event
- Any .Net Language

HIPPA Compatible ✦ Certified by CDC TIMS System ✦  
Security ✦ HL7 Interface ✦ Web Technology

## About CIMS, Inc.

**CDCIS.NET is a Subsidiary of CIMSgts.** CIMSgts operates as a systems integration firm, providing expertise and turn-key solutions in the areas of document management, electronic workflow, forms processing, database systems, and intranet networking systems. We provide detail-oriented, personal consulting to our customers. We are a premier reseller of high-end software/hardware and have the certifications (CDIA, MCSE, and MCP) needed to perform all forms design, installation, and consulting.

**Incorporated in 1996, CIMSgts is located in the suburbs of Huntsville, AL.** CIMSgts customers include government agencies, municipalities, major utility providers, universities, and large retail businesses. Our in-house professionals tailor a specific solution to each customer based on their individual needs, yielding the optimum comprehensive system for each unique knowledge management situation.
